15 3.2. Sociologo-Economic Background  
35 3.3. Legal Background

39 4. Sustainable sanitation as a tool for integrated management of biological waste and poverty alleviation in Bulgarian villages

49 5. Conclusions and recommendations

Diana Iskrevva SUSTAINABLE SANITATION

*"The lack of sanitation endured by 2.6 billion people is a hidden international scandal. It is the principal reason for the spread of diarrhoeal diseases and the toll they take on human lives."*

HRH Prince Willem-Alexander of the Netherlands, Chairperson, UN Secretary General's Advisory Board on Water and Sanitation
