- xi Acknowledgments*
xiii Abbreviations and Acronyms

C H A P T E R 1

1 Introduction

- 4 Objectives
5 Audience
5 A Primer on Environmental Health
6 A Primer on Malnutrition
7 Content and Organization

P A R T I

15 Epidemiology

C H A P T E R 2

17 Environmental Health, Malnutrition, and Child Health

- 18 Environmental Factors, Exposure, and Transmission Pathways
19 Vicious Cycle of Infections and Malnutrition
23 Environmental Role in Early Childhood Health
28 Averting Cognition and Learning Impacts
30 Key Messages
30 Note

C H A P T E R 3

31 How Environmental Health Supplements Other Child Survival Strategies

- 32 Adding Value to Health Systems
38 Adapting Environmental Management Programs
39 Adjusting Infrastructure Strategies
43 Key Messages
43 Notes

P A R T II

45 Economics

C H A P T E R 4

47 How Large Is the Environmental Health Burden?

- 48 Burden of Disease
51 Environmental Health Burdens
58 Areas for Future Research

59 Key Messages

59 Notes

C H A P T E R 5

61 Estimating the Environmental Health Burden and Costs at the Country Level

61 Existing Practice in Environmental Health Valuation

62 Building New Estimates for Environmental Health Costs

64 Case Studies of Ghana and Pakistan

66 Results for Ghana and Pakistan

77 Conclusion

79 Next Steps

81 Key Messages

81 Notes

P A R T I I I

83 Experiences

C H A P T E R 6

85 Approaches to Environmental Health

86 History of Environmental Health

88 Agenda Falling through the Cracks

90 Environmental Health Experiences in Developing Countries

97 Understanding the Enabling Environment

100 Governance and Institutional Implications

104 Institutional Requirements for Successful Environmental Health Governance

109 A Critical Moment

109 Key Messages

110 Note

C H A P T E R 7

111 Conclusion

111 Contributions of This Report

113 Next Steps

Appendixes

117 APPENDIX A: Technical Review of Cohort Studies

117 Background

118 Search Strategy and Selection Criteria

118 Findings and Discussion

122 Experimental Evidence from Deworming

123 Conclusions

125 Notes

141 APPENDIX B: Review of Studies on Nutritional Status and Education

145 Diarrhea and Education

145	Conclusions
146	Note
147	APPENDIX C: New Estimates for Burden of Disease from Water, Sanitation, and Hygiene
151	APPENDIX D: Computing Country-Level Environmental Health Burden of Disease
151	Mortality
160	Education
170	Notes
173	APPENDIX E: Methodological Aspects of Assessing Environmental Health Burden of Disease
173	From Relative Risks to Attributable Fractions
176	Dealing with Biased Estimates of Relative Risk
177	Notes
179	APPENDIX F: Monetary Valuation of the Cost of Environmental Health Risks
181	Note
183	<i>References</i>
201	<i>Index</i>

Boxes

2	1.1	What Is Environmental Health?
22	2.1	Impact of Diarrhea on Child Malnutrition: Evidence from Research
25	2.2	Overweight Mothers Carrying Underweight Children
50	4.1	Why 50 Percent? Supporting Evidence from Recent Cohort Studies
54	4.2	Revisiting the “Asian Enigma”
56	4.3	The Mills-Reincke Phenomenon
65	5.1	Basic Indicators for Ghana and Pakistan
75	5.2	Attributable Fractions and Burden of Disease When Multiple Risk Factors Are Present
80	5.3	How Policy-Makers Should Interpret These Results
87	6.1	Combating Disease through Improved Milk
92	6.2	Mexico: Multisectorality through a Diagonal Approach
93	6.3	Thailand’s National Nutrition Program
95	6.4	Ethiopia: The Toilet Revolution
97	6.5	Vietnam’s Dengue Program
101	6.6	Atrophy of Environmental Health Functions in India
102	6.7	Institutional Evolution of Environmental Health: The Case of Ethiopia

Figures

19	2.1	The F-Diagram: Transmission Routes for Infection
20	2.2	Relationship between Nutrition and Infection

24	2.3	Environmental Health Inputs and Health Outcomes in the Child's Life Cycle
27	2.4	The Window of Opportunity for Addressing Undernutrition
32	3.1	Range of Preventive Activities in Child Survival
52	4.1	The Health Effects of Environmental Risks Factors
53	4.2	Water-Related (WSH plus WRM) Burden of Disease in Children under Five Attributable to Environmental Risk Factors by WHO Region, 2002
55	4.3	Mills-Reincke Ratios for Subregions
63	5.1	Cost of Environmental Health Risks
70	5.2	Weight-for-Age Distribution of Children in Ghana and Pakistan
71	5.3	Two-Week Diarrheal Prevalence Rate by Age and Underweight Status in Ghana and Pakistan
73	5.4	Underweight Malnutrition Rates in Children with and without Diarrheal Infections in Ghana and Pakistan
74	5.5	Calculating Revised Estimates (Indirect and Direct Effects)
78	5.6	Final Results of Ghana and Pakistan Case Studies
152	D.1	Summary of the Methodology
155	D.2	Exposure Categories
159	D.3	Exposure Categories, Population Shares, and Relative Risks of ALRI in Ghana

Tables

3	1.1	Millennium Development Goals and Environmental Health
10	1.2	Annual Cost of Direct and Indirect Impact of Environmental Risk Factors in 2005
18	2.1	Water-Related Transmission Routes and Disease Outcome
21	2.2	Impact of Infection on Nutritional Status
33	3.1	Role of Environmental Health in Supplementing Health System Strategies
49	4.1	Environmental Risk Factors and Related Diseases Included in the Comparative Risk Assessment
67	5.1	Environmentally Attributable Fractions of Child Mortality, Keeping Malnutrition Unchanged
67	5.2	Estimated Mortality in Under-Five Children from Environmental Risk Factors, 2005
68	5.3	Malnutrition Rates in Children under the Age of Five
70	5.4	Malnutrition-Attributable Fractions of Child Mortality
74	5.5	Environmentally Attributable Fractions and Child Mortality with Malnutrition-Mediated Effects
76	5.6	Effects of Malnutrition on Education
79	5.7	Annual Cost of Direct and Indirect Effect of Environmental Risk Factors in 2005
126	A.1	Cohort Follow-up Studies Relating Infectious Disease and Nutritional Status of Children in Developing Countries
142	B.1	Studies of the Effects of Malnutrition on Educational Outcomes

- 148 **C.1** Burden of Disease (in DALYs) in Children under Five Years Attributable to Water, Sanitation, and Hygiene, by World Health Organization Subregions, 2002
- 152 **D.1** Causes of Death and Risk Factors Considered in this Study
- 154 **D.2** Estimating the Cost of Environmental Health Risks: Information Types and Sources
- 156 **D.3** Relative Risks by Exposure Categories, Assuming Cox Hazard Model
- 157 **D.4** Weight Gain Retardation Factors by Age and z-Score
- 158 **D.5** Weight for Age in Children under Five: Current Rates and Estimated Rates in the Absence of Diarrheal Infections in Ghana
- 159 **D.6** Estimated Mortality in Children under Five from Environmental Risk Factors, Ghana
- 161 **D.7** Estimated Annual Cost of Education Outcomes from Stunting and Share from Environmental Factors in Ghana
- 162 **D.8** Height Growth Retardation Factors by Age and z-Score
- 162 **D.9** Height-for-Age Rates in Children under Five: Current Rates and Estimated Rates in the Absence of Diarrheal Infections in Ghana
- 165 **D.10** Parameter Values Applied in Estimation of Income Losses
- 167 **D.11** Income Distribution across Malnutrition Categories and Wealth Quintiles in Ghana
- 168 **D.12** Annual Cost of Environmental Factors (Percentage of GDP in 2005), Using 3 Percent Discount Rate
- 169 **D.13** Annual Cost of Environmental Factors (Percentage of GDP in 2005), Using 5 Percent Discount Rate
- 174 **E.1** Environmental Risk Factors and Related Diseases Included in the WHO Comparative Risk Assessment
