Foreword

Introduction

page

Part 1: Waste management considerations in general - risks and environmental impact of healthcare waste

■	Fundamentals of healthcare waste generation and related hygiene risks	10
■	Definition and characterisation of healthcare wastes	10
■	Quantities of healthcare waste in various countries	13
■	Hygiene and environmental risks due to improper management of healthcare waste	14
●	Infection risks for healthcare personnel	15
●	Health risks for patients and visitors to health facilities	16
●	Risks for the environment and the neighbouring population due to healthcare waste	16
■	Fundamentals of waste management at health facilities in general	19
■	Avoidance of healthcare waste	19
■	Utilisation of healthcare waste	20
■	Disposal of healthcare waste	20
■	Factors influencing healthcare waste management in developing countries	22
■	Factors influencing waste management within a health facility	22
●	People's awareness of waste management in health facilities	22
●	Administrative and management structures for successful waste management	23
●	Appropriate technical facilities for handling healthcare waste	25
●	Financial aspects of healthcare waste management	26

Table of contents

●	Practical advice on waste management at small to medium scale healthcare facilities	27
■	External influencing factors on waste management	27
●	National waste management legislation	27
●	Necessary infrastructures for effective healthcare waste management	28
●	Influence of culture and local customs on waste management	29
■	Selected results from case studies in developing countries	30
	List of case studies	31
	List of references (Part 1)	32
	Glossary	35

Part 2: Practical solutions for healthcare waste management

Introduction		38
Worksheet 1:	Content of a waste management plan	39
Worksheet 2:	Monitoring waste generation	43
Worksheet 3:	List of possibilities to reduce and avoid waste	46
Worksheet 4:	How to segregate waste	49
Worksheet 5:	Appropriate collection and transportation of healthcare waste	52
Worksheet 6:	Checklist for safe storage of waste	56
Worksheet 7:	Collection and transportation systems for liquid waste and excreta	58
Worksheet 8:	Incineration of healthcare waste	65
Worksheet 9:	Wastewater treatment facilities	69
Worksheet 10:	Basic requirements for landfilling household type of healthcare waste	73
Worksheet 11:	Waste pit for infectious waste	76
Worksheet 12:	Soakaway for wastewater	78
Worksheet 13:	Checklist for regular monitoring of waste management	80
Worksheet 14:	Waste management related cost management	82
Worksheet 15:	Topics of a training manual for waste management	84
List of references (Part 2)		87
