

# Solid and Liquid Waste Management in Rural Areas

A Technical Note

## Contents

## Pages

|                  |  |    |
|------------------|--|----|
| <b>Foreword</b>  |  | 1  |
| <b>Preface</b>   |  | 3  |
| <b>Part A</b>    | <b>Technical Note on Solid and Liquid Waste Management</b>           | 5  |
| <b>Chapter 1</b> | Introduction to Solid and Liquid Waste Management                    | 7  |
| <b>Chapter 2</b> | Solid Waste Management   | 12 |
| <b>Chapter 3</b> | Composting as Technology option for Treatment of Biodegradable Waste | 16 |
| 3.1              | Introduction   | 16 |
| 3.2              | Composting   | 17 |
| 3.3              | Vermi Composting   | 21 |
| <b>Chapter 4</b> | Biogas Technology  | 28 |
| <b>Chapter 5</b> | Toilet Linked Biogas Plant   | 35 |
| <b>Chapter 6</b> | Reuse and Recycling of Non-biodegradable Solid Waste                 | 38 |
| 6.1              | Introduction   | 38 |
| 6.2              | Recycling of Papers  | 38 |
| 6.3              | Recycling of Plastics  | 40 |
| 6.4              | Landfill   | 40 |
| <b>Chapter 7</b> | Waste Water Management   | 42 |
| 7.1              | Introduction   | 42 |
| 7.2              | Technological options at Household Level Management                  | 43 |
| 7.2.1            | Kitchen Garden with Piped Root Zone System                           | 43 |
| 7.2.2            | Kitchen Garden without Piped Root Zone System                        | 44 |

|                      |   |           |
|----------------------|---|-----------|
| 7.2.3                | Leach Pit   | 44        |
| 7.2.4                | Soakage Pit   | 45        |
| 7.3                  | Technological options at Community Level Management<br>at Public Places on Site                               | 48        |
| 7.3.1                | Plantation with Intercepting Chamber  | 48        |
| 7.3.2                | Community Leach Pit   | 49        |
| 7.3.3                | Soakaway Channel  | 49        |
| 7.3.4                | Reuse of Greywater  | 52        |
| 7.3.5                | Root Zone Treatment System  | 54        |
| <b>Part B</b>        | <b>Compilation of Case Studies and Best Practices in Solid and<br/>Liquid Waste Management in Rural Areas</b> | <b>69</b> |
| <b>Case study 1</b>  | Practising Zero Waste Management in Vellore, Tamil Nadu   | 71        |
| <b>Case study 2</b>  | Solid Waste Management-Vermi-tank at Hari Mandir, Panchavati, Nashik  | 73        |
| <b>Case study 3</b>  | Vermi Composting from Solid Waste by KGS, Kanpur in U.P.  | 75        |
| <b>Case study 4</b>  | Making Nightsoil-based Biogas Plants viable in Maharashtra's Pune District                                    | 78        |
| <b>Case study 5</b>  | Solid Waste Management-Conversion of Waste Paper into "Pepwood"   | 81        |
| <b>Case study 6</b>  | Biogas Technology at KGS, Kanpur  | 84        |
| <b>Case study 7</b>  | Liquid and Solid Waste Management in Dhamner Village,<br>Dist. Satara in Maharashtra                          | 87        |
| <b>Case study 8</b>  | Greywater Management - A Case Study of Mehsana, Gujarat   | 90        |
| <b>Case study 9</b>  | Liquid Waste Management through Root Zone Treatment<br>at Community Level, Sughad, Gandhinagar, Gujarat       | 92        |
| <b>Case study 10</b> | Liquid Waste Management in Maharashtra  | 94        |
| <b>Case study 11</b> | Black Water Management from Community Toilet in Tamil Nadu  | 97        |
| <b>Case study 12</b> | Covered Drainage System in Banthra Village, Uttar Pradesh   | 100       |
| <b>Case study 13</b> | Eco Friendly Plastic Fuel<br>(Conversion of Waste Plastic into Liquid Hydrocarbons/Energy)                    | 102       |
| <b>Case study 14</b> | Graywater Recycling with Piped Root Zone Treatment  | 106       |
